We are getting closer.

We expect to have plain yellow and black as standard colours. All others are optional and can be purchased separately. For customers being interested in larger quantities we can even print their own design. (Shop name, national flag, product names like Hirobo...)

What you see here is all original, non-photoshoped.

The left grip will go as standard, the right grip is designed to let people carve their own shape. They can be bought separately at any time. Stock is available. So even if someone is „mis-carving“, he is just 15\$ away from a new part.

For the DACH countries, (Germany, Austria and Switzerland), we will offer a tray to feed the tray type clientel.

By January we will have sufficient stock of the decoration parts in yellow, black, red and blue plus wood and carbon. The soft-touch and metal surfaces can be seen and touched in Nuremberg ... we have to decide while touching.

Plain yellow,
both grip types
